

JFNEW SPECIALTY SEED MIXES

⊕ BUTTERFLY GARDEN LOW-PROFILE SEED MIX

This colorful seed mix contains 26 flowering species and 5 native grasses. This mix grows best with full sun in soil moisture that ranges from medium to dry. The diversity of this mix was designed to attract butterflies, birds and other wildlife.

1/4 acre \$ 320.00 1/2 acre \$ 560.00 1 acre \$ 980.00

⊕ SANDY SOIL FULL SUN PRAIRIE SEED MIX

This seed mix contains 27 native species chosen for their tolerance of harsh, sandy conditions. Eight grass and grass-like species and 15 flowering species are included. It is challenging to grow plants in sand; careful installation and maintenance are required to get these species established.

1/4 acre \$ 400.00 1/2 acre \$ 750.00 1 acre \$ 1,250.00

⊕ SANDY SOIL FULL SHADE SEED MIX

This mix contains 17 native species chosen for their ability to tolerate sandy shaded conditions. This mix contains a blend of grasses and forbs.

1/4 acre \$ 280.00 1/2 acre \$ 525.00 1 acre \$ 875.00

⊕ DEER RESISTANT SEED MIX

JFNew offers three mixes for areas with large deer populations. The species in these mixes are unpalatable to deer and reduce grazing. The Prairie mix is formulated for dry upland sites, the Shade mix is for upland wooded areas, and the Wetland mix is for saturated soil conditions.

Please call for specific seed mix prices.

⊕ CLAY TOLERANT PRAIRIE SEED MIX

Clay soils are slower to vegetate than most and require patience when seeded. The species for this mix were chosen for their ability to colonize clay soil conditions. This mix includes native grasses, forbs and legumes.

1/4 acre \$ 305.00 1/2 acre \$ 550.00 1 acre \$ 900.00

⊕ SALT TOLERANT SEED MIX

JFNew offers prairie and wetland mixes suitable for areas that experience salt runoff. These highly diverse mixes were designed for roadsides and utilize species that have displayed a tolerance for salinity.

Please call for specific seed mix prices.

⊕ DECIDUOUS WOODLAND SEED MIX

Designed to tolerate the conditions associated with rich, loamy, upland shaded areas, this blend of native woodland sedges and grasses is complemented by a host of flowering plants. This mix is a good start to establishing a diverse woodland understory. This mix will include at least 4 of 5 grass species and 9 of 12 forb species..

1/4 acre \$ 390.00 1/2 acre \$ 690.00 1 acre \$ 1,200.00
