

STORMWATER SEED MIX

A wetland seed mix for saturated soils in a detention pond or for seeding a saturated rain garden, this mix will tolerate highly fluctuating water levels and poor water quality associated with urban stormwater wetlands and ponds. For detention basins that experience long, dry periods, use the "Economy Prairie Seed Mix" in the upper third to half of the basin area. This seed mix includes at least 10 of 13 native permanent grass, sedge or rush species and 6 of 12 native forb species.

Botanical Name	Common Name	Oz./Acre
Permanent Grasses / Sedges / Rushes		
<i>Carex cristatella</i>	Crested Oval Sedge	1.00
<i>Carex lurida</i>	Bottlebrush Sedge	2.00

FEATURED SPECIES

Scirpus cyperinus Wool Grass Wet Prairie Sedge

Blooming from mid-to-late summer, this interesting and attractive sedge with loose, 7" rusty seed heads becomes woolly with age. With dense tussocks of linear-curving basal leaves and short-branching rhizomes, it is well-suited to naturalizing in moist-to-wet soil and full sun. It will commonly reach heights of 4'-5'.

Rudbeckia subtomentosa Sweet Black-Eyed Susan Mesic Prairie Forb

This wonderful plant grows up to 5' tall and produces a stunning display of bright yellow and brown flower heads in late summer to early fall. This plant prefers full-to-partial sun and medium soil moisture.
